Dear Hiring Manager,

I am writing to express my interest in the Startup Software Developer Internship position at Alien Attorney, as advertised on Indeed. As a highly motivated computer science student at Utah State University, I am eager to contribute my technical skills and passion for social innovation through technology to your mission of empowering immigrants.

My academic background has provided me with a solid foundation in software development, particularly in web development, which aligns perfectly with your project needs. In my coursework, I have gained practical experience in web frameworks like React and Django through projects like my full-stack web app, CatConnect (Which can be viewed on my GitHub linked above). I am confident in my ability to quickly learn and adapt to new technologies, and I am eager to further develop my skills in a fast-paced, real-world environment.

Beyond my technical abilities, I am deeply inspired by Alien Attorney's commitment to social good. The opportunity to leverage technology to create positive change and empower individuals aligns perfectly with my personal values. I am confident that my dedication, combined with my technical skills, would make me a valuable asset to your team.

Thank you for your time and consideration. I have attached my resume and portfolio, which further details my qualifications and projects. I am eager to learn more about this exciting opportunity and discuss how my skills and experience can contribute to Alien Attorney's mission.

Sincerely,
Jason Merrone
